GLOSS SCALE

TECHNICAL DATA:

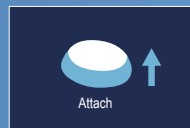

- Flash Point: >200F (>93.3C)
- Appearance: Pale light blue
- Physical State: Pourable cream
- Odor: Characteristic
- Specific Gravity: .97g/cm³ 8.09 lbs/Us Gal (H₂O = 1)
- Dangerous Goods: Not regulated - US DOT, IATA, IMDG

DESCRIPTION:

EXTREME FINISH Polish delivers unprecedented gloss levels while removing light swirls. Only the finest premium aluminium oxide abrasives are used. Super soft and combined with a rich emulsion chemistry that makes to paint surface 'pop' and stand out amongst all others. Perfect for very dark cars and as a final step to applying Ceramic or Graphene coating. Body shop safe and VOC compliant. Use with an ultra-soft foam or microfiber applicator on a DA or Rotary m/c.

DIRECTIONS OF USE:

Shake well. Be sure the surface is clean, shaded, cool and dry. Apply a several even drops amount of EXTREME FINISH to a finishing foam or microfiber polishing pad. Spread evenly over a 3 ft. by 3 ft. area. Use a DA or Rotary to buff slowly, applying even pressure. Allow EXTREME FINISH to almost disappear in the polishing phase, then wipe to a high gloss shine, flipping your clean microfiber towel.

1. Attach a clean polishing foam applicator to the DA or rotary machine.

2. Attach clean, compound foam pad, to the DA or Rotary machine.

3. Shake before use.

4. Apply to panel or pad and spread before starting machine.

5. Rotary speed 1200 rpm - 1500 rpm max. Even lineal strokes overlapping slightly. Polish until liquid has virtually disappeared.

6. Polish until product almost removed. Use clean microfiber for wipe down.

HEALTH & SAFETY

Can cause eye irritation. Excessive inhalation may cause respiratory irritation. Ingestion can cause gastrointestinal irritation. Prolonged skin contact may cause slight irritation. Eyes: Flush with water for 15 minutes, call physician if irritation persists. Inhalation: Remove to fresh air, call physician if irritation persists. Ingestion: Do not induce vomiting, call physician.
